

Assignment 3 - Detailed Feedback Report

Student ID: 63689

Assessment Overview

Your submission demonstrates a foundation that shows potential but requires substantial development. While there are fundamental elements in place, there are multiple critical areas requiring attention. You have substantial potential to improve, and the recommendations below outline a clear path forward to strengthen your software engineering practices and meet the assignment requirements.

Areas of Excellence

Your submission demonstrates particular strength in the following areas:

Ui Ux

- Found 5 image(s)/screenshot(s)
- Excellent visual documentation with 5+ images
- UI documentation found: requirements.txt

Testing Quality

- Found 3 test file(s)
- Good test coverage with 3 test file(s)
- Excellent test count: 81 test functions

Research Analysis

- Found 4 research document(s)

- Multiple research artifacts for comprehensive analysis
- Research documentation includes visualizations

Code Documentation

- README.md found (23177 bytes)
- Installation instructions found in README
- Usage examples found in README

Areas for Improvement and Development

The following areas require focused attention and development. Addressing these will significantly strengthen your software engineering practices and overall project quality:

Project Planning

Recommended Actions:

- Create PRD.md with Problem Statement, Functional Requirements, and Success Metrics
- Document architecture in README or ARCHITECTURE.md

Quality Standards

Recommended Actions:

- Configure linting tools (pylint, eslint, etc.)
- Set up CI/CD pipeline (GitHub Actions, GitLab CI, etc.)
- Create code style guide or CONTRIBUTING.md
- Set up pre-commit hooks for automatic quality checks

Extensibility

Current Status: Large files detected (avg 310 lines/file)

Recommended Actions:

- Create plugin/extension system for modularity
- Refactor into modular structure with smaller files
- Define more interfaces for better extensibility
- Document how to extend/customize the system

Version Management

Current Status: Moderate commit history: 7 commits

Recommended Actions:

- Make more commits to document project evolution
- Create PROMPT_BOOK.md to document AI interactions

Config Security

Current Status: No hardcoded secrets found in production code

Recommended Actions:

- Create .env.example file to document required environment variables
- Create .gitignore file and add .env to it
- Implement environment variable usage in code
- Improve .gitignore coverage for better security

Costs Pricing

Current Status: Limited cost documentation (5 mentions)

Recommended Actions:

- Create cost analysis document (e.g., COSTS.md, budget.xlsx)
- Add detailed cost analysis

- Create budget tracking system/document

Priority Action Items

Immediate Focus Areas:

These items require your immediate attention as they represent critical gaps in the current submission:

- Address Project Planning
- Address Quality Standards

High Priority Enhancements:

These areas would significantly strengthen your submission and should be addressed after the immediate focus items:

- Improve Extensibility
- Improve Version Management
- Improve Config Security
- Improve Costs Pricing

Conclusion

Your submission demonstrates potential, but requires substantial development in multiple critical areas. Focus first on the immediate priority items, which address fundamental requirements. Work systematically through each area, seeking examples and best practices. Remember that software engineering is a skill that develops through practice and iteration. Use this feedback as a roadmap for improvement.

Assessment Date: 2025-12-03

This report provides developmental feedback to support your learning and growth.
