Areas for Improvement and Development

While your submission is strong overall, the following areas present opportunities for minor enhancements that would further strengthen your work:

Extensibility

Current Status: Large files detected (avg 595 lines/file)

Recommended Actions:

• Create plugin/extension system for modularity

• Refactor into modular structure with smaller files

• Define more interfaces for better extensibility

• Document how to extend/customize the system

Priority Action Items

High Priority Enhancements:

These areas would significantly strengthen your submission and should be addressed after the immediate focus items:

• Improve Extensibility

Conclusion

Your submission demonstrates excellence in software engineering and LLM application development. The minor enhancements suggested above will help you maintain and further develop your already strong skills. Continue to build on this solid foundation, and focus on the advanced aspects that distinguish exceptional work from good work.
