FINAL GRADE	44%
STATUS	NEEDS IMPROVEMENT

Assessment Feedback

This submission requires significant improvement. You need to focus on fundamental software engineering practices including planning, documentation, testing, and version control.

Strengths

• Good documentation (comprehensive README, 100% docstring coverage)

• Multiple UI implementations (3 different interfaces)

• Clean PDR document

Required Improvements

• CRITICAL: Add .gitignore file (security requirement)

• CRITICAL: Add research analysis section (parameter investigation required - 0/10 points lost)

• CRITICAL: Improve git workflow (only 2 commits - version control requirement)

• Add comprehensive unit tests (more coverage needed)

• Implement cost tracking and analysis

• Add prompt documentation

• Add CI/CD pipeline

• Improve code modularity (files too large)

Please review the requirements and resubmit. Please review course materials and requirements carefully before your next submission.
